Sponsorship details

Thank you for your interest in supporting the Open Eugene Festival this winter. Part hack-a-thon, part conference, part art exhibition. We are working with learners & leaders to help citizens of Eugene open projects, improve collaboration, and inspire the community.

Participants can learn from Mozilla Open Leaders the basics of running open projects. Various local projects like KING-PONG (open hardware) and EugeneTech (open project) will be opened in real-time through the weekend in hands-on workshops. Bring your own projects and we'll help you pick the right open source or creative commons license to help share your work with the world.

Open Eugene Fest will be happening Friday November 30th and Saturday December 1st 2018.
